

# welding blanket

## NEOSAFE

- High performance Neoprene coated welding blanket
- Service temperature 550°C
- Abrasion and allergen resistant
- Provides isolated protection from sparks and spatter
- Excellent for use in protecting large painted surfaces when welding
- Fire retardant - Independently tested to AS2755.2-1985 and ISO 3795-1989

### **NEOSAFE WELDING BLANKET**

High performance neoprene coated welding blanket which is ideal for protecting large and long painted or sensitive surfaces during the welding process. Excellent for use in shutdowns or large projects where welding is carried out above existing structures etc. The neoprene provides a smooth surface for the welding spatter to fall away.

**SAFE SITE READY WELDING SOLUTIONS**
